

MTBF Test Report

Tested Model	12.1" cMT X Series models
Quantity of Tested Samples	10 units
Test Duration	1,000 hours
Test Date	2023.10.31~2023.12.15
Test Condition	temperature : 55°C, humidity : 90%
MTBF	147,000 hours
Included Models	cMT2128X

1. The MTBF formula is :
$$MTBF = \frac{1}{\lambda} = \frac{2 * tp * AF}{X^2(\alpha, \beta)}$$

2. Parameter Description :

λ	Steady State Failure Rate
tp	Total Test Time
AF	Acceleration Factor
$X^2(\alpha, \beta)$	Non-Central Chi-Squared Distribution Function

3. Calculated Parameter Value :

Confidence Level	90%
AF	63.36
tp	9,040 hours
$X^2(\alpha, \beta)$	7.779

4. Test Result :

$$MTBF = 2 * 9040 * 63.36 / 7.779 \doteq 147,262 \text{ hours}$$

$$\doteq 147,000 \text{ hours}$$
